MiningInsights™ Site Visit & Research Report Les Ressources Dianor Ltée (DOR-V C\$0.10)

NEWS RELEASE

Toronto, Canada. Mining Insights Inc. is pleased to announce publication of a detailed investment report on MI Research Partner Les Ressources Dianor Ltée. Project potential was reviewed on a recent site visit to the company's Wemindji, Québec diamond exploration properties including the outcrop in which the company discovered the first diamond in the area.

"Dianor is rewriting the book on diamond exploration", said Managing Director Jim Steel MBA P.Geo, "mobile metal ion geochemistry is eliminating the need to follow diamond dispersion trains and with pionjar drilling, allows quantification of a target quickly and at very low cost."

The report includes video analysis of primary project value drivers and can be downloaded by subscribers from <http://www.mininginsights.com>. - simply login and search 'Dianor'. An excellent (English) review of the site visit from the Northern Miner Magazine can also be viewed [here](#), and in French, [here](#).

MiningInsights™ provides detailed mining asset and investment risk-based research on mining and exploration equities meeting strict qualification criteria as well as global resource investment analysis using cutting edge valuation models and tracking indices to astute mining equity investors worldwide.
